Instructor-led language learning technology The most effective solution possible

On a daily basis, instructors are challenged to find the best possible materials to support their language courses. Enter Auralog's e-System. With this solution instructors are able to quickly leverage the powerful features of Auralog's award-winning TELL ME MORE® commercial products in an instructor-led environment. Combining proven instructional design with state-of-the-art technology, TELL ME MORE® enables instructors to ensure their learners achieve the highest possible language proficiency levels.

The fully installed e-System delivers the ultimate in flexibility, control and security. Our turn-key solution allows you to customize your own language programs based on your needs and objectives. We simply provide you with all of the tools necessary to be successful! Learners can easily access their courseware and interact directly with tutors, instructors, and administrators all from within this easy to implement solution.

A complete solution for learner success

The e-System comes fully equipped with the entire TELL ME MORE® language library (all languages), as well as our advanced instructor, tutor, and learner management and reporting modules. These modules support advanced learner progress tracking, knowledge transfer reporting, as well as in depth program customization. Instructors can now take their language programs to the next level by building and delivering their programs directly from within the e-System while students benefit from individual personalized learning programs based on assessments.

Accessible anytime, anywhere

The e-System can be fully hosted on your internal network allowing learners and instructors anytime, anywhere access. Whether you are in a high security environment or your learners are globally dispersed, the e-System is available to support your needs.

The e-System at a glance
